Imagem indisponível

Motores submersíveis rebobináveis de 6", 7", 8" e 10" JOVAL, com fio PE2/PA para alta temperatura (50°C). Construção robusta em aço inoxidável AISI 304, ideais para aplicações exigentes em furos profundos e sistemas industriais.

Motores submersíveis rebobináveis JOVAL, fabricados em aço inoxidável AISI 304 e 316, com alta resistência à corrosão e rigidez dielétrica com fio PE2/PA. Ideais para variadores de frequência, bombeamento solar e águas até 50°C. O design rebobinável permite a substituição do estator em campo, reduzindo significativamente os custos de manutenção em instalações de difícil acesso. Disponíveis em diâmetros de 6", 7", 8" e 10", com potências adequadas a captações de grande profundidade e caudal elevado.

APLICAÇÕES

- Captação de água limpa em furos profundos, poços, barragens e lagos.
- Abastecimento urbano e rural.
- Irrigação agrícola de grandes áreas.
- Processos industriais e transferência de líquidos.
- Abastecimento de água de elevada exigência
